About the AACP Curriculum Quality Surveys

The Graduating Student, Alumni, Preceptor, and Faculty surveys were first released in 2007. These surveys were based on the Accreditation Council of Pharmacy Education's (ACPE) 2007 Standards with the intention of gathering continuous improvement data for the colleges and schools of pharmacy.

In spring 2015, the AACP Institutional Research and Assessment Committee (IRAC), AACP staff, and ACPE staff revised these curriculum quality perception surveys to accommodate changes with the release of ACPE's 2016 Standards. In 2018, IRAC decided to move the demographic questions on three of the curriculum quality surveys (Graduating Student, Preceptor, and Alumni) to the end of the survey instrument. The Faculty demographic question section was already at the end of the survey instrument.

In 2021, IRAC decided to expand the demographic questions to include additional questions on race, ethnicity, English language proficiency, and first-generation student status. In addition, a few questions were added related to awareness of student loan repayment programs. The 2022 results reflect the first administration of these revised surveys.

2023 Administration

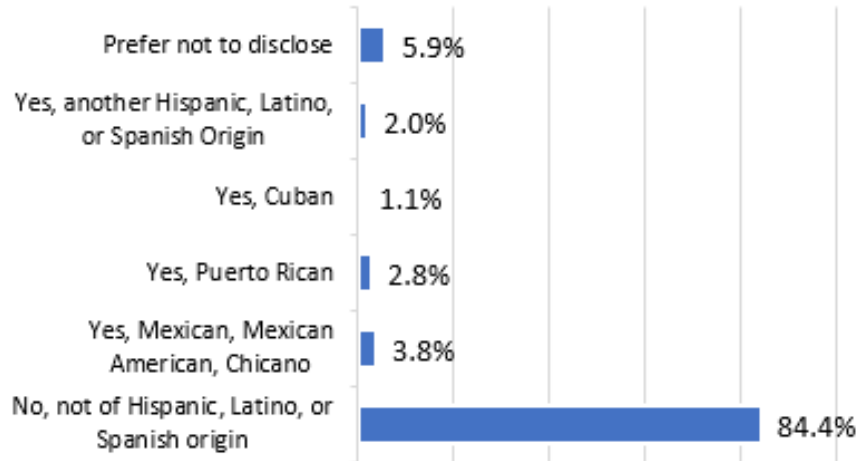

The Graduating Student Survey became available for online access in the AACP Survey System on March 27, 2023. As of August 2023, 138 colleges and schools of pharmacy that graduated students in 2023 administered the survey to their students. A total of twelve thousand, four-hundred and forty-nine (12,449) graduating students were invited to complete the survey. Eight thousand and nine-hundred and ninety-nine (8,999) graduating students submitted the survey for a total response rate of over seventy two percent (72.3%). Response rates per school ranged from over 10 percent (10.3%) to 100 percent. For more information regarding this summary report or the administration of the survey, please contact the Office of Institutional Research & Effectiveness at data@aacp.org.

2023 Highlights

Demographics

2023 was the second year AACP administered a revised demographics section, including new questions on race, ethnicity, first-generation student status, and English language proficiency. Some demographic highlights are provided below:

81. Are you of Hispanic, Latino, or Spanish origin?

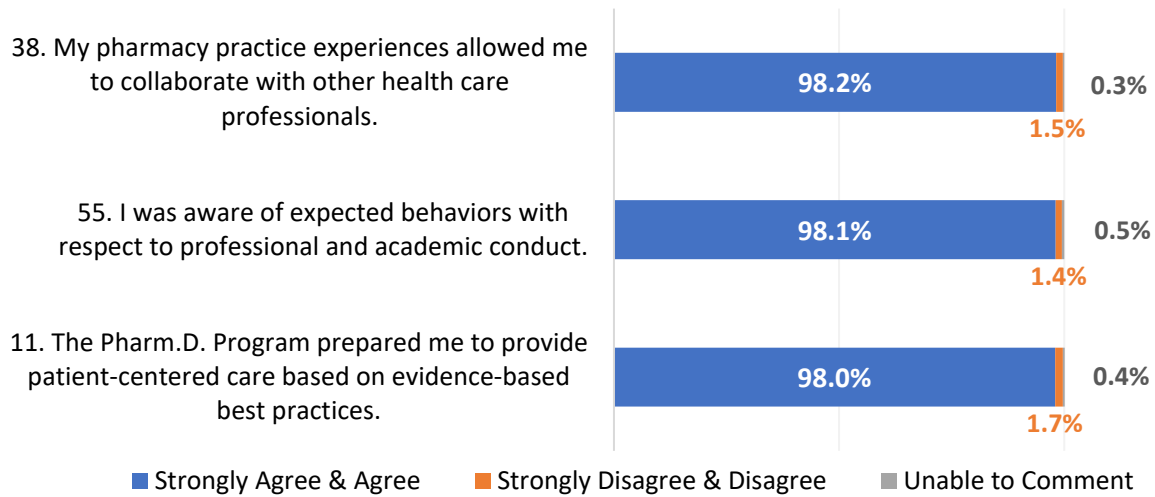

83. Do you identify as a first-generation student?

The questions with the highest level of agreement included questions 38, 55, and 11:

The statements that graduating students agreed with the most were:

The questions with the highest level of disagreement included questions 60(b), 60(c), 70, and 46:

The statements that graduating students disagreed with the most were:
